iXL Required Summer Work 2022: Grades K-12 Mathematics

Christ's Church Academy

What is iXL?

> IXL, at its most basic, is a targeted learning tool. It offers experiences for students, tailored to their age group by specific subject and topic. By offering analytics and recommendations, it is able to help support teaching and learning with a very focused outcome. IXL is web-based but also has apps for iOS, Android, Kindle Fire, and Chrome.

CCA makes meeting the needs of our students a priority. iXL is a web-based platform used to help personalize instruction for each of our students. Summer break is a perfect opportunity for students to devote time for growth and reinforcement in identified areas.

Each student in grades K- 12th grade is expected to complete 100 mathematic problems in June and 100 math problems in July using the iXL platform.

During the month of June, students are expected to complete 100 problems on the grade level they just finished. During the month of July, students are expected to complete 100 problems on the grade level they will enter for the 2022-23 school year.

*Mathematic instructors will verify assignment completion on the 1st day of school.

All returning CCA students will have their iXL login information remain the same during the summer.

Students who attended CCA for the 2021-2022 school year and are not reenrolled by June 1, 2022, will have current accounts deactivated.

Students who have recently enrolled at CCA will receive an email with detailed information to access an iXL account by June 10, 2022.
